Host and module compatibility record

One record for the module, host, adapter and software you plan to evaluate.

PROJECT / REFERENCE

ENGINEER / DATE

CHECK AND DETAILS TO KEEP	YOUR RECORD / EVIDENCE REFERENCE
Module Full ordering code, hardware revision, installed firmware and selected host interface.	
Host and adapter Host model, carrier-board revision, adapter model and the corresponding schematic references.	
Signal path The transport required by the module and the signals actually connected through the socket and adapter.	
Board integration Power, reset and SIM routing, with the relevant board-guide references and observations.	
Software Operating-system and driver versions, detected control and data ports, and the connection log.	
Result Observed outcome, test conditions and unresolved checks. Mark combinations that have not been tested.	

Send this record with your BOM when requesting a host and module assessment.
